

How to save the Earth

Done by
Arina Valeeva

Save our planet!

"Happiness - it's to be with nature,
to see her, talk to her."
(L.N. Tolstoy)

There are lots of environmental problems - endangered species, water shortages, air pollution, tons of litter...

You must look after the environment.

Protect all living

Throw away or recycle all our waste

Try not to waste energy

Several rules

Before you throw anything away, stop and think.

If you have a choice avoid buying packaged goods.

Never drop litter

Help to clean up your local environment.

Put out food for wild animals in winter.

Take some friend along and join the group – you'll have fun as well as helping the environment.

Let's save the planet because there is no better planet

2013 - environmental year

What you have
done useful for
this year, you
have helped
nature....

The End
